Refurbished Computer SALE!

Low-Cost Refurbished Pentium 4 Desktop & **LAPTOP** Computers

TeamChildren has provided over 10,000 low cost refurbished computers to families, schools, or organizations who cannot afford a new computer.

Three easy steps to receive a computer:

1 Write a letter: Each family is required to write a letter/essay explaining why they cannot afford a new computer and how having a computer will help their children and family. This letter helps TeamChildren determine the economic circumstances of your family and document how the computer will help your family. Please include your name, address, phone number, email address, and if you have one, a picture of your family.

We love great letters!

2 Contribute Financially: Everyone is asked to pay an administrative fee from \$25-\$275. Minimum deposit of \$25 or the full amount of the computer you choose (check or money order) **must be included in your letter**. The amount you contribute is only a small portion of what it actually costs to help you receive a computer. To raise the additional funds, we are reaching out to area businesses and foundations. Select the computer you can afford, and pay your balance when you come to pick up your computer.

3 Volunteer: Each family that receives a computer is required to volunteer for **two hours on the day you pick up your computer**. If this is a problem, you can request an alternative form of contribution.

Please send your letter and payment to:

TeamChildren
960 Rittenhouse Road
Audubon, PA 19403

Make Checks Payable to "TeamChildren"

Please include your name, address, phone number, email, and family photo with your letter.
